ABOUT ME

Highly motivated and versatile Systems Engineer with over ten years of experience in the areas of system administration, design, implementation & support of Windows Server Systems, and networking. Skilled are not limited only to data development and analysis but also proficiency in web development and technology analysis. Known for problem-solving prowess, data-driven decision-making, and a strong analytical mindset. Combining the strengths of a developer, technology analyst, and web developer, I bridge the gap between data and user-friendly applications for comprehensive data solutions. Possess good communication skills, attention to detail, and the ability to work in a fast-paced environment. Seeking a challenging position in a fast-paced environment that will allow me to contribute my skills and experience to the overall success of your organization.
